Our in-house repair department focuses on scheduling time-lines that work best for you. Our urgent quoting system allows for a quick diagnosis and prompt pickup of broken components. Multiple Hyspeco teammates tend to your assets, working diligently to deliver quality repairs with your best interest in mind.

- Repair/Inspect Cylinders, Motors, Pumps, Actuators, and more
- Customize Hydraulic Cylinders
- Weld Repair
- Urgent Troubleshooting
- Refurbish or Replace Components
- Lathe Abilities
- Hydraulic Layout Design

Ask about our 90 day repair warranty.

FIELD SERVICE & REPAIRS

Anytime EMERGENCY Service

The Hyspeco Field Service team provides emergency on-site repair, inspection, installations and component replacement for hydraulic, pneumatic, and other motion control systems. With 7 Hyspeco locations, our fleet accommodates a majority of the Midwest region with 24/7 repair service and maintenance programs.

We pride ourselves on best in industry quality and on-time start-ups.

PREVENTATIVE MAINTENANCE

Protect Your Assets

Downtime can be one of the most costly business scenarios. Our maintenance programs combat breakdowns by using our team as a time sensitive resource.

- Filter Services to ISO Standards
- Hydraulic Moisture Removal
- Machine Malfunction Diagnostics
- Component Repair/Replacement
- Testing of Pumps & Motors
- Planned Investment, and NOT an Unexpected Cost

Each client has a different set of requirements in regards to the health of their facility, so we custom tailor a preventative maintenance program to suit customer specific needs.
