UNPARALLELED HOSE VARIETY

Our hose building abilities know no limitations. With an immense variety of hose types and over 100,000 feet of hose in stock, we have the ability to meet almost any industry demand. An additional inventory of 40,000 + hose fittings makes for millions of combinations and endless possibilities.

INDUSTRIES

- Hydraulic
- Pneumatic
- Fuel
- Water
- Beverage
- Medical
- Agriculture
- Construction
- Automotive Repair
- Lift Trucks
- Aerospace
- Manufacturing

HOSE INVENTORY CHARACTERISTICS

PSI	from 300 - 10,500 (20 BAR - 620 BAR)
Size (I.D.)	from 1/8th inch - 10 inch
Hose Material Types	Stainless, Steel, Corrugated Plastic, Nylon, PVC, EPM, Teflon, Rubber, Nitrile
Hose Guard Options	Firesleeve, ParKoil, Spring Guard, Partek Defense, Whip Restraint, Partek Wrap, PolyGuard

Our assembly process is aided by the Marken 500 automatic hose cutting technology. Cutting at a rate of 12.5 cuts a minute (750 cuts per hour) makes large quantity orders

quickly attainable with complete accuracy. Operating with a feed rate of 150 FPM makes for quick production of longer hose designs and allows for shorter lead times in all time sensitive situations.

Our hose production ink jet printing capabilities:
Line Marking | Part Number | Logo | Bar Code

Quality Control

Precision is of the utmost importance when it comes to how we operate as a company. This is why we have extensive quality checkpoints at every stage of our hose building process. Each hose assembly is built to the same high quality standards we use when building hose assemblies for our own machinery and equipment. Pro-active precision is the foundation of our service to you.

Customer Service

We are here to walk you through every step. Our customer service and engineering representatives are standing by to make sure you have a hose assembly that meets your specifications.

Kitting Capabilities

Every customer of ours is valued, and we return that value by kitting each order or hose production batch to our customers' specifications. Want to kit similar part numbers? Done. Got a project that requires multiple hose lengths and fitting combinations? No problem. You name it, we can do it.

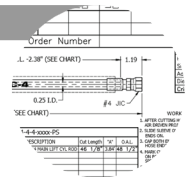

CONTACT

Start by speaking with one of our customer service teammates so we can build what is right for you.

DESIGN

Our engineers will design the hose combination to your desired specifications free of charge.

VERIFICATION

The hose design is verified with you before it is sent to manufacturing to ensure quality and precision.

BUILD

The flexibility of our production line allows for orders of all sizes. Our teammates build to ISO quality standards in a time efficient manner.

DELIVERY

We will kit and package to your desired requirements, efficiently shipping your order in accordance with our on-time shipping methods.
